

FLOODING IN THAILAND! TIME FOR A QUICK HELP!

Monsoon floodwaters are causing widespread damage and devastation throughout Thailand. The flooding - which is reported to be the worst in decades - has claimed the lives of more than 340 people and has had a dramatic toll on Thailand agriculture and industry. Major industrial estates have been forced to shut down operations.

BELFOR is already providing disaster recovery services for commercial clients in need. Services include all structural, machinery and equipment restoration services which BELFOR offers worldwide.

24-h emergency no.: +66 2 3000 184

The media is full with disaster news about the flooding in Thailand. High time for a positive message: BELFOR helps you with all types of flood damage - quickly and competently.

How BELFOR can help with flood damage:

- **Immediate action** - Remove water and recover building contents
