

# SETTING NEW STANDARDS FOR CLEAN

**BIOPROTECT™ RTU Antimicrobial Surface Protectant Remains Active For Up To 90 Days**

**BELFOR is the Exclusive Provider and the ONLY BIOPROTECT™ CERTIFIED COMPANY in the Restoration industry.**

## THE CHALLENGE:

Common surfaces (touch-points) are cleaned with disinfectants leaving behind no effective residual protection and within hours of disinfection, bacteria can grow exponentially.

## INTRODUCING THE BIOPROTECT™ RTU ANTIMICROBIAL SURFACE PROTECTANT:

- Water-based antimicrobial technology that is applied after surfaces are cleaned with disinfectants.
- Creates an invisible layer of spikes on a surface that binds to almost any porous and non-porous surfaces and mechanically kill microbes (bacterias, molds, fungus)
- Provides persistent and continuous protection - efficacy remains active on surfaces for up to 90 days.
- BIOPROTECT™ RTU is approved for use as an antimicrobial preservative under EPA and FDA regulations to preserve food contact articles.
- Can be used on food surfaces, appliances, equipment and utensils. No rinse required for food surfaces.
- EPA-registered and made in the USA.

**BIOPROTECT™  
RTU**

- **Water-Based**
- **Odorless and Colorless**
- **Persistent - Works In DRY STATE**
- **pH Balanced and Hydrophobic**
- **Environmentally Responsible**

- **Non-Flammable**
- **Non-Corrosive**
- **No Leaching or Migrating**
- **No Heavy Metals**
- **No Volatile Organic Compounds (VOCs)**
