## MACHINERY RESTORATION

# BELFOR

## PROPERTY RESTORATION

## PRECISION MACHINE RESTORATION

BELFOR has been at the forefront of machinery decontamination and restoration for more than 30 years and is recognized as a leading specialist in the industry. The type and range of machinery that can be decontaminated and restored by BELFOR is constrained only by the type and severity of damage.

BELFOR has a team of engineers and technical advisors who are trained and certified to handle every step of the process -- including first aid measures, disassembly, decontamination, calibration, re-assembly, installation, commissioning, and safe transport.

With a proven record of successful recovery projects around the world, BELFOR has performed all types of machinery and equipment restoration including:

- Ventilation Systems
- Industrial Plant Machinery
- Generators and Engines
- Food Processing/Packaging
- Control Instruments
- Textile Machines
- Office/IT Machines
- Agricultural Machines
- Fluid Technology
- Welding and Compressed Air
- Conveying Systems
- Precision Tools
- Mining Machines
- Process Control Equipment
- Foundry Machines
- Plastic Molding and Extrusion
- Wood Working Machines
- Iron and Steel Plant Mfg.
- Locomotives
- Building Materials Machines
- Paper Manufacturing
- Industrial Robots
- Compressors/Pumps
- Scales and Balances
- Ship/Offshore Supply
- Building Automation/HVAC

## FIRST AID MEASURES

- Recover, protect, drying and pre-cleaning
- Corrosion control to protect against further damage
- Site containment to prevent cross-contamination

## MACHINERY RESTORATION

- Disassembly of component parts on site
- Restoration of individual components
- Re-assembly and re-commissioning

## ULTRASONIC CLEANING SERVICES

To prevent further deterioration, BELFOR offers its unique Ultrasonic Cleaning Service - the fastest, most effective method available for cleaning and completely de-rusting contaminated machinery and equipment.

## RELIABLE RESULTS

- Through its own Research & Development team, BELFOR has created proprietary dip line cleaning agents, processes and procedures that produce reliable results with unmatched effectiveness.
- To speed up the recovery process, minimize business disruption, and reduce costs, BELFOR will set up ultrasonic dip lines on site.
- Large equipment and machinery parts can be totally submerged in BELFOR's industrial Ultrasonic Cleaning tanks -- unlike many other cleaning options.

## FOCUSED SERVICE AND DELIVERY

- Stabilization, inspection, assessment, and recovery.
- Project management and consulting services.
- Strict compliance to industry standards and safety regulations.
- Performance and quality control checks to maintain customer requirements.

## REASONS TO RESTORE MACHINERY

- Minimize business interruption.
- Cost-effective solution to replacement.
- Prevent total loss of investment.
- Internal resources are not available.
- Technical requirements can only be achieved in cooperation with OEMs.
- Technical documentation is not available.
- Safeguard maintenance contracts.
- Long lead times for new or spare parts.
- Increased safety risks and hazards if non-standard components are used.
